

Replication

Stephanie Wykstra

December 13, 2013

What is replication?

Two main kinds of activities

Examining the original study

- Re-analysis using original data/code
- Robustness checks

Doing a new study

- Repeating very similar study
- Modifying the study in various ways to test external validity and/or theory

Some big questions

How to increase re-analyses/robustness checks?

Repeating studies: What counts as success or failure?

Transparency in qualitative research?

Now for the panelists!
